OBSERVATIONS/ACTION REQUIRED

Routine inspection and in general all found to be satisfactory. The only item of concern noted was that there is a build up of mould within the ice making machine, which will require to be cleaned and sanitised more frequently. I recommend that this task could be carried out at the same time as your beer lines are cleaned. You could also make a note in a diary or calendar to the effect that these tasks have been done. This will provide the evidence for these tasks being carried out routinely.

Thank you for your cooperation.
